Forecast for Friday 01 Apr 2022

Weather: A few snow or hail showers possible, but otherwise a fine, dry morning after a cold start. Frozen surfaces likely, with frost and icy routes, especially at height. Any showers fading, with freezing levels rising a little by the afternoon, allowing some good spells of sunshine. Staying largely dry through the evening.

Chance of cloud-free hill tops above 600m: 80% best chance during the afternoon.

Low cloud and visibility: Cloud generally above the summits but will fall to 600m during snow showers leading to very poor views on the tops. More extensive cloud also expected at 600m towards midnight, spreading south. Away from showers visibility will be very good to excellent, but falling to poor to very poor during any snow.

Meteorologist's View

Some fine but chilly conditions, although mountain goers should be ready for rapid deteriorations in any showers with a chance of snow and hail. It will also be feeling cold out of any direct sunshine.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Saturday 02 Apr 2022

Weather: Cloudy with **a** band of snow spreading south though the early hours, but soon clearing early morning. Sunny spells developing through the morning, but also a few further showers. These falling as snow above 200m at first, with some icy routes likely at height and out of direct sunlight. Snow level rising to around 600m through the day. Away from showers, a largely fine day can be expected.

Maximum wind: Northeasterly 10-20mph

Chance of cloud-free hill tops above 600m: 30% during the morning, increasing to 90% by the afternoon

Low cloud and visibility: Very poor visibility early hours, with cloud obscuring most tops above 500m. This lifting and breaking through the morning, although cloud likely to persist above 800m, especially during any snow showers. Snow will also lead to poor to very poor visibility at times, but otherwise some very good to excellent views of distant peaks

Temperature: **Valleys:** Minus 2 Celsius rising to Plus 9 Celsius
At 600m: Minus 2 Celsius, rising to Plus 1 Celsius
Freezing level: 300m rising to 800m
